

Issue 1, February, 2012

Please allow me to introduce you to our new newsletter entitled REP-CALL. Information flow in the construction business world is continually improving thru use of the internet and email so it seems only appropriate to reach out to the design community by using a Monthly Newsletter sent via E-mail. This is an added service that we wish to provide to give you more timely product information along with related code and design considerations. It is our goal to provide information, within our scope of products, which will help you in your task to provide your clients quality buildings within their budget and schedule.

This issue's company spotlight

hadrian®

In this first edition we are featuring a great and often overlooked choice in toilet partitions. An industry leading innovative company, Hadrian Inc., uses full galvanneal steel and state of the art powder coating technology to produce a durable, lasting metal partition of unmatched value.

We are very interested to know how helpful you find our Newsletter & would appreciate your feedback regarding the contents. Also we wish to hear suggestions on future topics you care to know more about. Please fill free to send us a reply e-mail with your suggestions. Thank you sincerely for reading,

David Youngblood, President
Youngblood Associates, Inc.

Powder Coated

TOILET PARTITIONS

Offering the best value in the industry, powder coated toilet partitions address the key areas of durability, high recycled content, fire resistance and graffiti resistance – all at an entry-level price!

Outstanding Performance – Stainless Steel.

With long lasting beauty, gleaming modern appearance and easy to clean maintenance, Hadrian's stainless steel toilet partitions are ideal for high moisture conditions, high traffic areas & luxurious end use applications.

- Corrosion Resistant and Durable is exceptionally maintenance-free
- Secure & concealed hardware on durable rust resistant steel material
- 91% Recycled content make this material an excellent LEED choice
- Industry-best fire resistance – Class A
- Superior Hygienic attributes
- 2 Standard Finishes: #4 Brushed & Embossed plus Hybrid Finish. Embossed on outside for increased vandalism protection and #4 brushed on the exterior to maintain a clean, smooth appearance on the outside. Custom finishes are available as well.

CODE CORNER

Per IBC 2006 Toilet Partitions are now required to comply with ASTM E 84 and have a Class A, B, or C flame spread rating. Solid Plastic Toilet Partitions are now required to be a minimum of Class B flame spread rating in many building

occupancies. Hadrian's HDPE material smoke & flame spread requirements are Class B Certified*. (* excluding the 100% post-consumer recycled content 241 Ebony)

LEED CORNER

Metal vs. Plastic

Laminate toilet partitions

With the high recycled content that metal toilet partitions offer vs. only 5% (if this much) minimum pre-consumer recycled content in standard Plastic Laminate toilet partitions Metal partitions offer a clear LEED advantage. When cost is factored in Metal has an advantage which can be multiplied when Life-Cycle cost are considered. The REAL basic problem with most Plastic Laminate partitions is the particle board (MDO) substrate. When exposed to moisture it will swell up, cause delamination and retain odors.

Since its founding in 1983, Hadrian Manufacturing Inc. has been an environmentally responsible corporate citizen. We take special care with regard to the environment so you can feel good about choosing Hadrian Products.

NEW Hadrian Website

The site has full product information and timesaving tools, offering a higher level of functionality and ease of use. The home page offers 1-click access to useful tools & information:

- Spec Creator - immediate access to in-depth product information, which allows users to quickly & easily create custom specifications & submittal documents
- Hardware guide - Full online product library
- LEED Information
- Continuing Education access free online AIA/CSI credit class
